

Curacao Drone Registration Notes

Jeff Maass 26 October 2018

Contacts: Michael Llanes, Aviation Safety Inspector Operations, CCAA, Michael.llanes@gobiernu.cw, telephone 011-5999-839-3319. He will send you the application form, which you can complete and send back by email. This process will be available on a new CCAA web site Real Soon Now, according to Mr. Llanes.

Mr. Glennert Riedel, BTP: Mr. Llanes will provide contact information for him, and will coordinate your application with him. BTP is, of course, concerned with the radio frequencies and powers used, information available from the Drone specs and included on your application form.

The entire process took ~24 hours for me, an amazement as I have some experience with dealing with normal Curacao bureaucracy! They emailed me a PDF copy of the signed, stamped document.

The registration is by drone type, so one application for my two DJI Mavic Pro. If I had a Phantom or Inspire, each would require a separate application/registration.

Registration form: http://www.ccaa.cw/wp-content/uploads/2018/01/88133_RPA-001_RPARegistration-JAN-2017-2.pdf

I should have said that the entire process for me was accomplished by email in January. I was told that the process would be on a new CCAA web site Real Soon Now, and I see that the form is now available on the web. There has been quite a bit of improvement in the process in the past year, as they define the needs!

The registration form is now online at : http://www.ccaa.cw/wp-content/uploads/2018/01/88133_RPA-001_RPARegistration-JAN-2017-2.pdf

Contacts:

Michael Llanes, Aviation Safety Inspector Operations, CCAA, Michael.llanes@gobiernu.cw, telephone 011-599-9-839-3319.

You can complete and send him the registration form as he instructs.

Mr. Llanes will provide contact information for Mr. Glennert Riedel at BTP, and will coordinate your application with him. BTP is, of course, concerned with the radio frequencies and powers used, information available from the Drone specs and included on your application form.

One person on the 'MavicPilots.com' web page reported recent (2018) success by sending an initial inquiry to the following contact at BTP: ing. Rochello Viceisza, Technical Affairs Officer, r.viceisza@burtel.cw, Phone 011-599-9-463-1749, FAX 011-599-9-736-5265

The entire process took ~24 hours for me, an amazement as I have some experience with dealing with normal Curacao bureaucracy! They emailed me a PDF copy of the signed, stamped document with all approvals.

The registration is by drone type, so one application for my two DJI Mavic Pro drones. If I had a Phantom or Inspire, each would require a separate application/registration.
